SECTION II - COMPOSITION / INFORMATION ON INGREDIENTS				
HAZARDOUS INGREDIENTS	% (by weight)	CAS Number	LD ₅₀	LC ₅₀
Not Applicable (N/A)				

Hazardous mixtures of other liquids, solids, or gases:

- 1.- Carbon Dioxide, Compressed, CAS# 124-38-9, UN1013
- 2.- Nitrogen, Compressed, CAS# 7727-37-9, UN1066
- 3.- Pyrotechnic Signaling Device (flares) including:

Signal Devices, Hand, UN0191, 1.4G Cartridges, Signal, UN0405, 1.4S Signals, Smoke, UN0197, 1.4G

Articles Pyrotechnic, UN0432, 1.4G

Flares, Aerial, UN0403, 1.4G

Flares, Aerial, UN0505, 1.4G

SECTION III – HAZARDS IDENTIFICATION

SECTION IV - FIRST AID MEASURES

Liferaft contains a steel or aluminum cylinder of gas under pressure which may discharge or rupture under extreme temperatures. Liferaft contains pyrotechnic signaling devices (flares) that are explosive. Flares will burn with intense heat when exposed to fire. Keep away from flame or flame producing sources.

LIL CONTACT IVA			
INHALATION	N/A		
INGESTION	N/A		
In general, liferafts	present no hazards that would require first a	id measures.	
	SECTION V - FIRE FIGI	HTING MEASURES	
Flammable: D	o ⊠ Yes - identify under which conditions	Liferaft contains pyrotechnic signaling devices (flares) that are explosive. Flares will burn with intense heat when exposed to fire.	
Means of Extinction		Large volumes of water	
Special Fire Fighting Procedures:		Pyrotechnic signaling device (flares) may include material that contains its own oxygen to maintain burning. Do not try to smother or use dry chemical.	
Flashpoint (°C) and Method		N/A	
Upper Flammable Limit (% by volume)		N/A	
Lower Flammable Limit (% by volume)		N/A	
Autoignition Temperature (°C)		Auto Ignition > 175 °C (350 °F)	
Explosion Data - Sensitivity to Impact		N/A	
Explosion Data - Sensitivity to Static Discharge		N/A	

fighting fires.

May form harmful fumes under fire conditions. Use airventilated full mask and full protective clothing when

Safety Data Sheet Marine Liferafts

SECTION VI - ACCIDENTAL RELEASE MEASURES				
Leak and Spill Procedures	Hazardous materials are contained in sealed units within packed liferaft. Spills should pose no threat if the sealed units are not breached. If compressed gas cylinder ruptures, ventilate area. If pyrotechnic signaling device ruptures, material spilled from unit should be swept away and burned by trained personnel. Ignition sources must be avoided. Handle materials with care.			
	SE	CTION VII - HANDLING AND STORAGE		
Handling Procedures and Equipment	Do not drop the packed liferaft. Do not pull the inflation lanyard (painter line) on the raft. Only lift the packed raft by its handles if packed in a fabric valise. If raft is packed in a hard container, lift from bottom. Opening the raft valise or hard container may cause the raft to inflate. Liferaft can cause injury if inflated close to people or in a confined area. The liferaft's compressed gas cylinder is equipped with a pressure relief device. The device will vent gas from the cylinder if stored at temperatures above 130°F. The raft may partially or fully inflate if the pressure relief device activates.			
Storage Requirements	These flame.	units should be stored in a cool, dry area away from danger of sparks, heat or

SECTION XVI- OTHER INFORMATION

Disclaimer Liability: Since conditions or methods of use are beyond our control, we do not assume any responsibility and expressly disclaim any liability for any use of this product. The information contained in this MSDS is believed to be true and accurate. All statements or suggestions are made without warranty, express of implied, regarding the accuracy of the information, the hazards connected with the use of the product, or the results to be obtained from the use thereof. Compliance with all federal, state, and local laws and regulations remains the responsibility of the user.

User Responsiblity: This MSDS cannot cover all possible situations which the distributor, retailer, or end user may experience during transport, storage, processing, or use. The user should examine each aspect of his operation and determine if additional precautions should be taken. All health and safety information contained in this MSDS should be provided to the user's employees or customers. It is the user's responsibility to use this information to develop appropriate work practice guidelines and employee training programs for his operation.
