

JON BUOY® RECOVERY MODULE

Recovering a man overboard can be an extremely hazardous operation, regardless of vessel size. The Jonbuoy Recovery Module is designed to make this simple, while increasing vital visibility and buoyancy. Accepted as a direct replacement for a traditional danbuoy, horseshoe, drogue, light and whistle, specified within the ISAF offshore special regulations.

Available in 4 variations in pushpit and bulkhead mounts with white or black casing.

Product Details:

- Automatic inflation
- Water-activated light
- Lifting ring and 4 point harness
- SWL of 200kg
- Retroreflective binding
- Large ballast pocket
- 5m weighted throwing line
- Repackable
- Compact & lightweight
- Slimline container

New Features for MK5

- Better in-water performance
- New style casing
- Retro-reflective binding
- AIS attachment patch
- Larger visible mast
- Oversized Ballast
- Fully supported lifting mechanism
- Remote station release option

RECOVERY MODULE RELEASE SYSTEM

The module release system allows the Jon Buoy Recovery Module to be remotely deployed. A simple switch system fires a small CO₂ cylinder, and allows the system to be disarmed.
