

PRODUCT DATASHEET

JON BUOY RECOVERY MODULE

Recovering a man overboard can be an extremely hazardous operation for both the crew and the casualty, regardless of vessel size. The Jon Buoy Recovery Module is designed to make this a simple operation, whilst increasing vital visibility and protection for the casualty.

Accepted as a direct replacement for one traditional danbuoy, horseshoe, drogue, light and whistle, specified within the World Sailing Offshore Special Regulations, where two would normally be required.

The Jon Buoy Recovery Module casing is available in four variations in pushpit and bulkhead mounts with white or carbon options.
